Union Island Gas Mokelumne Zone Fluid.pdf

Hi Michele,

I am resending this email to you. The one I sent earlier bounced back and I've found out that the email address I used was wrong. Hope you get this time. David's cc: went through.

Thanks,

Jerry

**Subject:** Union Island Gas Mokelumne Zone Fluid

Michele,

I'm sending you the scanned document indicating that the zone fluid in the Mokelumne sands in Union Island Gas is more than 10,000 mg/L. This is the analysis of the zone fluid sample taken from well "Galli-1" which is the sole WD well in this field. Please let me know if you have any questions. Thank you.
